EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Charles on November 8, 2004.

The application has been amended as follows:

The Specification:

On page 65, line 1, insert – **Brief Description of the Drawings** --.

The Claims:

In claim 1, line 6, delete "and wherein" and insert – wherein the fabric care agent comprises a fabric softener active, and --.

In claim 8, line 2, delete "a fabric softener active,".

In claim 11, line 1, delete "fabric conditioning agent is wherein the fabric care agent is a".

In claim 11, line 2, delete "having" and insert – has --.

In claim 19, line 1, after "ratio" insert – of --.

Cancel claim 42.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance.

Of the references of record, the most pertinent are WO00/24852 or WO00/06690. '852 teaches a detergent composition suitable for use in the kitchen or bathroom. The detergent composition separates into at least two aqueous phases in a state of rest. However, '852 does not teach the use of a fabric softening agent or the specific phase separation inducement polymer as recited by the instant claims.

'690 teaches a perfume-containing water-in-oil microemulsion which is capable of being mixed with an aqueous fabric softener base composition to provide perfume. The use of the microemulsion enables the addition of perfume as well as other cosmetic attributes to an aqueous base composition under conditions of low shear while avoiding any problems of gelation or physical instability in the finished fabric softener. However, '690 does not teach the use of the specific phase inducement polymer as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a rinse-added fabric care composition having two visually distinct phases containing a fabric softener, a phase separation inducing polymer, and the other requisite components of the composition in the specific proportions as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
